

Knowledge Base

General Information

1. Project Description

BeFit is an e-commerce platform specializing in supplements and nutritional foods, catering to individuals interested in fitness and health. This model incorporates several distinct approaches, including an online store with a product catalog, a personalization process through questionnaires or biometric analyses that generates tailored recommendations based on user needs, and a subscription system for regular orders.

2. Team Members

Name	Role	Address
Diego Alejandro Jasso Fernandez	Frontend Stakeholder	al222804@alumnos.uacj.mx
Anna Lizbeth Barajas Sandoval	Full stack Database engineer	al222835@alumnos.uacj.mx
Gabriel Alberto Vilchis Ríos	Full stack AWS architect	al215460@alumnos.uacj.mx
Luis Ubaldo Flores Pineda	Full-stack Documenter	al223046@alumnos.uacj.mx
Ricardo Rodriguez Ponce	Front-end UI/UX designer	al223229@alumnos.uacj.mx
